

Viewports Practice Exercise

In order to get some experience with these commands, set up a screen with four viewports using a top, front, side and camera or perspective views as displayed below:

Be prepared to be able to demonstrate the following techniques to the instructor when asked:

- Panning around on the screen, scrolling the buttons/panels
- Zooming
- Changing window types
- Centering the view on a certain object
- Switching views (top, front, side, camera, free-rotate)
- Opening and closing the Tool Shelf and Transform Panel

**** Call the instructor when finished****
